Milli-Q® Service Advanced™ Pharma Plan

Designed & fit for regulated environments

Receive specialized help in complying with international quality standards. Our Pharma plan contains a complete set of operational verification tests with related procedures that follow guidelines (e.g., cGMP, GLP).

Qualification protocols

Requalification procedures for demonstrating compliance with regulations

Maintenance procedures

Log files enabling full traceability of critical system components

Calibration certificates

Certify that monitoring devices are properly calibrated with traceability to national and international standards

Qualification test equipment

All test equipment needed for qualification is calibrated according to metrological norms with traceability to the international standards

Qualified service engineers

Only service engineers who have successfully completed an extensive Validation program may perform requalification procedures

*Available for high-flow 7000 series systems: Milli-Q® HX, HX SD, HR and CLX, and benchtop Milli-Q® IQ, IX and EQ water purification systems.

†Speak with your local lab water representative to find out if this service is available in your country.
