

Steritest® NEO Sterility Testing Devices

Convenience, Reliability and Safety

Sterility testing is one of the most crucial steps in pharmaceutical product release.

Our Steritest® NEO devices simplify every aspect of testing, from handling to traceability, all within a closed concept system. The ease and convenience of this closed assembly enable you to increase productivity while maintaining the highest levels of quality and reliability. When used with the Steritest® Symbio pump and Steritest® culture media and fluids, the Steritest® system delivers unmatched sterility testing consistency.

Since 1974, we have been the market leader in sterility testing. Our Steritest® NEO devices set a new standard for excellence while maintaining all the advantages of membrane-base sealing technique.

Closed device for complete testing confidence

Using Steritest® NEO devices ensures that pharmaceutical products are never exposed to the environment during the testing process. Filtering, rinsing, media transfering and incubating are all conducted within the Steritest® NEO closed system. There is no need to open the containers or manipulate the membrane at any time—greatly reducing the risk of adventitious contamination resulting in false positive results.

Consistent performance

We rigorously test each device during and after manufacturing.

- 100% integrity testing on every canister
- Strict physical and microbiological tests at every step of the assembly of the Steritest® NEO device prior to release from manufacturing
- Certificate of quality provided with each system for your batch records
- Easy traceability with catalogue number, lot number, serial number and expiration date engraved on each canister
- New: 2D data matrix barcode on the label for easy data processing in a broad range of systems (ERP, LIMS, etc...)

Benefits

- Thermo-sealing of filtration membranes in all Steritest® NEO units ensures full device integrity, efficient membrane rinsing and elimination of by-pass and false negative results
- Velax® cutting clamp, a safe and convenient way to cut the tubing. Available on each Steritest® NEO devices removing the need of scissors.
- New needle design fits the majority of test containers while maintaining a closed concept system
- Pre-installed colored clamps prevent any media transferring errors and improve your workflow
- Volume graduation on the canisters improve your workflow accuracy (addition of a 25 mL graduation)
- Pre-cut line on accessories bag to ease the opening
- Placement mark on tubing to optimize the placement in the pump head
- Engraved information on each canister and peel-and-stick box label improve traceability
- Smart Label with 2D data matrix barcode to retrieve product data (item code, batch number, shelf life, etc...). It allows an easy data processing in a broad range of systems (EPR, LIMS, etc...)

Latest innovations

New tool for safe & easy cutting of tubes

Thanks to the new convenient Velax® cutting clamps there is no longer a need to use scissors to disconnect the tubing.

Simply moving the cutting clamp to the right position and pressing it will easily sever the tubing with no risk to fingers or gloves.

The Velax® cutting clamps are now mounted on all Steritest® NEO devices at no extra cost and add a further safety feature to Steritest® sterility testing.

New needle designs for increased safety and flexibility

New needle guard and needle protector designs increase confidence in manipulating the needle.

The two-part protective cap gives access to either a short (35 mm) or a long (60 mm) needle—select the one that works best with your sample packaging.

In addition to the multiple needle configurations, a new short (20 mm) needle is now dedicated to cartridges and small soft plastic containers. Learn more with our video on **SigmaAldrich.com/video-steritestneo-ca**

For products without antimicrobial agents

The "Blue Base" Steritest® NEO devices offer the ultimate in flexibility. Perfect for use with the majority of pharmaceutical drugs that do not have antimicrobial activity, our mixed esters of cellulose HA membrane allows fast flow rates for optimum throughput performance, and reduced testing time. A range of ergonomic needles is available to meet specific drug packaging requirements as well as simplify handling for gloved operators.

For antibiotics and products with antimicrobial agents

The "Red Base" Steritest® NEO devices, ideally suited for antibiotic sample testing, incorporate our Durapore® (PVDF) HV membrane, offering broad chemical compatibility and low binding properties. The chemical composition of the extremely thin 0.45 µm Durapore® membrane provides low antibiotic binding, which improves rinsing efficiency and reduces the risk of false negative results. The canister design ensures efficient rinsing of residual antimicrobial agents and the needle and connections minimize the risk of antibiotic residuals.

For products requiring increased chemical compatibility

The "Green Base" Steritest® NEO devices are suited for viscous products, such as creams and ointments, which are normally diluted in a sterile solvent, such as isopropyl myristate (IPM) to improve filterability. The solvent-resistant nylon canister and the Durapore® (PVDF) HV membrane ensure a perfect chemical compatibility with IPM and other solvents. The reinforced base structure and canister connection quarantee an unmatched pressure resistance of the testing device during the whole filtration process. The "Green Base" Steritest® NEO devices are the perfect choice for testing solvents, creams, ointments and veterinary injectables.

Specifications

Canister Base Color	Blue	Red	Green
Canister Base Membrane	Mixed Esters of Cellulose membrane, 0.45 μm	Low adsorption Durapore® membrane, 0.45 µm hydrophilic PVDF	Low adsorption Durapore® membrane, 0.45 µm hydrophilic PVDF
Materials of Construction Filtration Chamber (Canister): Double Lumen Tubing: Needle:	Styrene acrylonitrile (SAN) PVC, 850 mm length Stainless steel and polyamide 6-6	Styrene acrylonitrile (SAN) PVC, 850 mm length Stainless steel and polyamide 6-6	Polyamide 6-6 (nylon) PVC, 850 mm length Stainless steel and polyamide 6-6
Sample Container Capacity	120 mL (graduation marks at 25, 50, 75 and 100 mL)	120 mL (graduation marks at 25, 50, 75 and 100 mL)	120 mL (graduation marks at 25, 50, 75 and 100 mL)
Minimum Flow Rate (for water)	300 mL/min at 690 mbar (10 psi)	300 mL/min at 690 mbar (10 psi)	300 mL/min at 690 mbar (10 psi)
Maximum Temperature	45 °C	45 °C	45 °C
Maximum Operating Pressure	3.15 bars at 25 °C (45 psi at 77 °F)	3.15 bars at 25 °C (45 psi at 77 °F)	3.15 bars at 25 °C (45 psi at 77 °F)
Sterilization	Gamma irradiation	Gamma irradiation	Gamma irradiation

Ordering information

Steritest® NEO devices for products without antimicrobial agents

Steritest® NEO devices for antibiotics and products with antimicrobial agents

Description	Pack size	Catalog number	
Liquids in ampoules and collapsible bags			
Steritest® NEO device		TZHALA210	
Steritest® NEO device double packed		TZHALA205	
Liquids in large vials			
Steritest® NEO device		TZHALV210	
Steritest® NEO device double packed		TZHALV205	
Liquids in small vials			
Steritest® NEO device	10	TZHASV210	
Steritest® NEO device double packed	10	TZHASV205	
Medical devices and collapsible bags			
Steritest® NEO device	10	TZHAMD210	
Liquids in syringes			
Steritest® NEO device	10	TZHASY210	
Liquids in plastic containers			
Steritest® NEO device	10	TZHAPC210	
Soluble powders in ampoules			
Steritest® NEO device	10	TZHADA210	
Soluble powders in vials			
Steritest® NEO device	10	TZHADV210	
NEW Liquids in cartridges and small soft plastic containers			
Steritest® NEO device	10	TZHACA210	

Description	Pack size	Catalog number	
Antibiotics			
Steritest® NEO device	10	TZHVAB210	
Steritest® NEO device double packed	10	TZHVAB205	
Powders and superpotent antibiotics			
Steridilutor® NEO device with expension chamber		TZVC00010	
Steritest® NEO device	10	TZHVAB210	
Recommended accessories			
Holder for Steridilutor® NEO vent chamber	1	SYMBSVB01	
Steritest® vent needles	25	TEFG02525	
Liquids in large vial			
Steritest® NEO device	10	TZHVLV210	
Steritest® NEO device double packed	10	TZHVLV205	
Liquids in small vial			
Steritest® NEO device	10	TZHVSV210	
Steritest® NEO device double packed	10	TZHVSV205	
Soluble powders in vials			
Steritest® NEO device	10	TZHVDV210	
Steritest® NEO device double packed	10	TZHVDV205	
Medical devices and collapsible bags			
Steritest® NEO device	10	TZHVMD210	
NEW Liquids in cartridges and small soft plastic containers			
Steritest® NEO device	10	TZHVCA210	

Note: For antibiotics or strong inhibitory products, the use of the TZHVAB210 filtration devices is highly recommended. Prior to the filtration step, it is recommended to dissolve and/or pool samples with the Steridilutor® NEO device.

Steridilutor® NEO devices and accessories

Description		Catalog number		
Steridilutor® NEO device for vials				
Steridilutor® NEO device without expansion chamber		TZV000010		
Steridilutor® NEO device with expansion chamber	10	TZVC00010		
Steridilutor® NEO device for liquid transfer				
Steridilutor® NEO device for liquid transfer		TZA000010		
Sterile vent needles				
Steritest® vent needles		TEFG02525		

Steritest® NEO devices for increased chemical compatibility

Description		Catalog number		
Solvents, creams, ointments, and veterinary injectables				
Steritest® NEO device	10	TZHVSL210
